Lipids and Lipid Metabolism

Vol. 1166, 1993

Cumulative Contents

Editorial vii

Information for Contributors ix

Review

Bile salt-activated lipase. A multiple function lipolytic enzyme
C.-S. Wang and J.A. Hartsuck (USA) 1

Regular Papers

Dietary $n-3$ fatty acids accelerate catabolism of leukotriene B_4 in human granulocytes
C. von Schacky, R. Kiefl, A.J. Marcus, M.J. Broekman and W.E. Kaminski (Germany, USA) 20

Apolipoprotein A-I stabilizes phospholipid lamellae and thus prolongs nucleation time in model bile systems: an ultrastructural study
S. Tao, S. Tazuma and G. Kajiyama (Japan) 25

Amphipathic α-helical peptides based on surfactant apoprotein SP-A
L.R. McLean, J.E. Lewis, K.A. Hagaman, T.J. Owen and R.L. Jackson (USA) 31

The surface properties of lung 36 kDa Ca^{2+}-dependent phospholipid-binding protein
F.H.C. Tsao, C.S. Gau, H. Yu and G. Zografi (USA) 39

In vitro photodynamic lipid peroxidation of total lipophilic extracts from leaves of bean plants
R. Ferrari-Iliou, A. D'Arcy-Lameta, J.-P. Iliou, A.T. Pham Thi, F. Monteiro De Paula, J. Vieira Da Silva and P. Mazliak (France) 48

Occurrence of phosphonotetraglycosyl ceramide in the sea hare *Dolabella auricularia*
T. Matsubara and A. Hayashi (Japan) 55

The shuttling of dolichol between VLDL and HDL: involvement of a protein factor from lipoprotein-deficient human serum
G. Van Dessel, A. Lagrou, H.J. Hilderson and W. Dierick (Belgium) 64

Early effects on mitochondrial and peroxisomal β-oxidation by the hypolipidemic 3-thia fatty acids in rat livers
D.K. Asiedu, J. Skorve, N. Willumsen, A. Demoz and R.K. Berge (Norway) 73

Type II phospholipase A_2 in human gestational tissues: Subcellular distribution of placental immuno- and catalytic activity
W. Farrugia, M.A. Aitken, F. van Dunné, M.H. Wong, S.P. Brennecke, K.F. Scott and G.E. Rice (Australia, Netherlands) 77

Total parenteral nutrition and plasma lipoproteins in the rat: evidence for accelerated clearance of apo-A-I-rich HDL
T. Hajri, J. Férézou, P. Steinmetz and C. Lutton (France) 84

Reaction of lecithin:cholesterol acyltransferase with a water soluble substrate: effects of surfactants
F.S. Bonelli and A. Jonas (USA) 92

Inhibition of fatty acid synthesis in rat hepatocytes by exogenous polyunsaturated fatty acids is caused by lipid peroxidation
L. Mikkelsen, H.S. Hansen, N. Grunnet and J. Dich (Denmark) 99

Effect of chemically modified G_{M1} and neoglycolipid analogs of G_{M1} on liposome circulation time: evidence supporting the dysopsonin hypothesis
Y.S. Park and L. Huang (USA) 105

Hepatic uptake and metabolism of ingested 24-hydroxycholesterol and 24(*S*),25-epoxycholesterol
S.E. Saucier, A.A. Kandutsch, D.S. Clark and T.A. Spencer (USA) 115

Responses of purified phospholipases A_2 to phospholipase A_2 activating protein (PLAP) and melittin
M.R. Steiner, J.S. Bomalaski and M.A. Clark (USA) 124

Rapid Reports

Detection of a point mutation in cholesteryl ester transfer protein gene by polymerase chain reaction-mediated site-directed mutagenesis
A. Matsunaga, K. Araki, K. Moriyama, K. Handa, F. Arakawa, K. Nishi, J. Sasaki and K. Arakawa (Japan) 131

continued

Relationship between the size and phospholipid content of low-density lipoproteins
P.J. Barter, O.V. Rajaram, H.-Q. Liang and K.-A. Rye (Australia) 135

Regular Papers

Phospholipid methylation in brain membrane preparations: kinetic mechanism
R.C. Reitz, D.J. Mead and W.H. Welch, Jr. (USA) 139
Effect of cholesteryl ester on the distribution of fluorescent cholesterol analogues in triacylglycerol-rich emulsions
Q.-T. Li and W.H. Sawyer (Australia) 145
Structural studies of lipid fibers formed by sphingosine
D.D. Archibald and S. Mann (UK) 154
Comparative antioxidant activity of tocotrienols and other natural lipid-soluble antioxidants in a homogeneous system, and in rat and human lipoproteins
C. Suarna, R.L. Hood, R.T. Dean and R. Stocker (Australia) 163
The occurrence of furan fatty acids in *Isochrysis* sp. and *Phaeodactylum tricornutum*
A. Batna, J. Scheinkönig and G. Spiteller (Germany) 171
24-, 25- and 27-hydroxylation of cholesterol by a purified preparation of 27-hydroxylase from pig liver
E. Lund, I. Björkhem, C. Furster and K. Wikvall (Sweden) 177
Effect of VLDL on the inhibition of arachidonic acid transformation by dexamethasone in cultured smooth muscle cells
I. Petrichenko, D. Daret, J. Larrue and Y. Shakhov (Russia, France) 183
Involvement of tyrosine kinase in growth factor-induced phospholipase C activation in NIH3T3 cells
M. Imoto, I. Sujikai, H. Ui and K. Umezawa (Japan) 188
Desaturation and chain elongation of *n*–3 and *n*–6 polyunsaturated fatty acids in the human CaCo-2 cell line
Q. Chen and Å. Nilsson (Sweden) 193
Structural and functional properties of natural and chemical variants of apolipoprotein A-I
A. Jonas, A. Von Eckardstein, L. Churgay, W.W. Mantulin and G. Assmann (USA, Germany) 202
Induction of cyclooxygenase and suppression of 12-lipoxygenase in human erythroleukemia cells upon phorbol ester-induced differentiation
I. Mahmud, T. Suzuki, Y. Yamamoto, H. Suzuki, Y. Takahashi, T. Yoshimoto and S. Yamamoto (Japan) 211
An endogenous inhibitor of PAF-induced platelet aggregation, isolated from rat liver, has been identified as free fatty acid
A. Siafaka-Kapadai and D. Hanahan (USA) 217
Biosynthesis and characterization of phosphatidylglycerophosphoglycerol, a possible intermediate in lipoteichoic acid biosynthesis in *Streptococcus sanguis*
T.-h. Chiu, H. Morimoto and J.J. Baker (USA) 222
Simultaneous changes in lipid composition, fluidity and enzyme activity in piglet intestinal brush border membrane as affected by dietary polyunsaturated fatty acid deficiency
D. Daveloose, A. Linard, T. Arfi, J. Viret and R. Christon (France) 229
Cholesterol feeding induces hypertriglyceridaemia in hamsters and increases the activity of the Mg^{2+}-dependent phosphatidate phosphohydrolase in the liver
V.A. Sessions, A. Martin, A. Gomez-Muñoz, D.N. Brindley and A.M. Salter (UK, Canada) 238
Simplified methods for the synthesis of 2-hexadecanoylthio-1-ethylphosphorylcholine and for the determination of phospholipase A_2 activity
M.K. Bhat, I. Mueller-Harvey, I.G. Sumner and P.W. Goodenough (UK) 244
Synthesis of phosphatidylcholine in guinea-pig fetal lung involves acyl remodelling and differential turnover of individual molecular species
G.C. Burdge, F.J. Kelly and A.D. Postle (UK) 251
bis-Allylic hydroxylation of linoleic acid and arachidonic acid by human hepatic monooxygenases
E.H. Oliw (Sweden) 258
Formation of platelet-activating factor-like phospholipids by Fe^{2+}/ascorbate/EDTA-induced lipid peroxidation
T. Tanaka, H. Minamino, S. Unezaki, H. Tsukatani and A. Tokumura (Japan) 264
A pool of reversibly cell-associated cholesteryl esters involved in the selective uptake of cholesteryl esters from high-density lipoproteins by Hep G2 hepatoma cells
F. Rinninger, S. Jaeckle and R.C. Pittman (Germany, USA) 275
Selective association of lipoprotein cholesteryl esters with liver plasma membranes
F. Rinninger, S. Jaeckle, H. Greten and E. Windler (Germany) 284

Rapid Reports

Lecithin–cholesterol acyltransferase: effects of mutagenesis at N-linked oligosaccharide attachment sites on acyl acceptor specificity
O.L. Francone, L. Evangelista and C.J. Fielding (USA) 301

Monensin inhibits synthesis of plasma membrane sphingomyelin by blocking transport of ceramide through the Golgi: evidence for two sites of sphingomyelin synthesis in BHK cells
K.-J. Kallen, P. Quinn and D. Allan (UK) 305

Evidence for biosynthesis of plasmenylcholine from plasmenylethanolamine in HL-60 cells
M.L. Blank, V. Fitzgerald, T.-c. Lee and F. Snyder (USA) 309

Cholesterol uptake in the human intestine. Hypo- and hyperresponsiveness
I.G. Safonova, D.D. Sviridov, A. Roytman, F.M. Rytikov, V.V. Dolgov, J.-L. Nano, P. Rampal and V.S. Repin (Russia, France) 313
